1 Purpose

This document describes the Colledia Control configuration file autohost.xml

The intended audience for the document is system developers and system maintainers.

1.1 Introduction

The configuration file autohost.xml is a XML file that stores a configuration setting for the Autohost application.

1.2 Location

The autohost.xml file is located at:
`%CC_ROOT%\%CC_SYSTEM%\config\autohost.xml`

1.3 Contents

1.3.1 Host

For each autohost instance there is a "host" section with an id, the ID that matches the command-line parameter that autohost is started with determines which host section is used.

1.3.1.1 Application

Within each host XML fragment there entries for each application (app). Each application has a name and a panel, optionally there is also an instance that the panel will be targeted at.

1.3.2 Example Configuration

```xml
<?xml version="1.0" ?>
<autohost>
 <host id="Autos_One" >
         <app name="Test Automatic" panel="test" />
         <app name="R2" panel="Alarms\tx_view3" instance="R2" />
         <app name="R3" panel="Alarms\tx_view3" instance="R3" />
 </host>
 <host id="Autos_Two" >
         <app name="Test Automatic One" panel="test1" />
         <app name="Test Automatic Two" panel="test2" />
 </host>
</autohost>
```

Sample contents for autohost.xml

In the sample shown there are sections for 2 autohost instances. Looking at the first instance it has 3 applications, 2 of which are targeted at a specific instance.
